

What is a
habitat?

What do we mean
when we say that
all living things are
interdependent?

What do we mean
when we say that all
living things are
adapted to live in
their habitat?

What is a food
chain?

In this food chain,
which organism is
the producer?

In this food chain,
which organism are
the consumers?

In this food chain,
which organisms
are the predators?

Which ones are the
prey?

How many
different types of
habitat can you
name?

In what way can a
habitat become
endangered?

How we can protect
habitats and the
organisms that live
in them?
